# alphaDUR Remote Software
alphaSOFT II

Data management and remote control of the alphaDUR II and alphaDUR mini

The windows software alphaSOFT features the remote control of the portable hardness tester alphaDUR. alphaSOFT provides the graphical analysis of the readings and facilitates the creation of test reports. The readings will be transmitted to the PC and can comfortably be analysed and managed.

FUNCTIONS

- ➤ Recording of measurement data taken with the alphaDUR
- ➤ Clear presentation of the measurement data as chart, table or histogram
- ➤ Statistical analysis of measurement data
- ➤ Setting of the alphaDUR measurement parameter.
- ➤ Storage of con gurations of measurement parameter on the alphaDUR or on the computer.
- ➤ Upload of data logger groups stored on the alphaDUR
- ➤ Loading and deletion of measurement parameter configurations stored on the alphaDUR or on the computer.
- ➤ Correction of measurement data is possible at any time. During recording of measurements selected readings can be deleted.

- ➢ Print of charts, tables and summary including statistics
- ➢ Multiple series of measurements can be displayed in one chart, provided that test load, material and hardness scale are equal
- ➢ A use -defined logo can be embedded
- ➢ For each series of measurements, a title and 8 other texts with user-defined labels can be entered
